

DESIGNER LINE SANDWICH UNIT

Model: DL36-10C-FB

36" Cutting Top Sandwich Unit Refrigerator with Solid Doors - 10 Pans Front Breathing

Stainless steel exterior and interior.
Certified under NSF-7 to maintain temperatures in 86°F ambient and designed to maintain NSF-7 temperatures in 100°F ambient.

Options and Accessories

(upcharge and lead times may apply)

Glass doors in lieu of solid doors - GD models	Stainless steel shelves
Stainless steel finished back in lieu of aluminum	Expansion valve system
Overshelves (single or double)	Rear-mounted cutting board
Additional epoxy-coated steel shelves	Flat insulated night cover
Automatic, electric condensate evaporator	Remote models
Custom pan openings	Door locks

Consult factory for other model configurations, options and accessories.

Standard Model Features

REFRIGERATION SYSTEM

- Performance-rated refrigeration system
- Environmentally-safe R-134a refrigerant
- Unique air flow distribution allows pan product to maintain 33° - 41°F
- Automatic, energy saving, non-electric condensate evaporator
- Non-corrosive, plasticized fin evaporator coil
- Easily serviceable, back mounted compressor

CABINET ARCHITECTURE

- 2" non-CFC polyurethane foam insulation
- Spring loaded, self closing doors
- Magnetic snap-in door gaskets
- Heavy-duty, epoxy-coated steel shelves
- 19" deep, full length nylon cutting board
- Insulated lid
- 3 5/8" casters
- Completely enclosed, vented and removable case back

MODEL FEATURES

- (10) 1/6 size non-recessed pans, 4" deep
- Interior hanging thermometer
- Field rehingable doors

Front breathers are a unique, field assembled, bottom mounted ventilation system designed to allow cabinets to be flush against a wall or built into a counter to conserve space.

REFRIGERATION SYSTEM

Self-contained refrigeration system is rear mounted, concealed behind a removable louvered cover. Full-length front air grille allows for even air circulation to condensing unit. A "performance rated", air-cooled, hermetically sealed, capillary type refrigeration system is installed in model. Plasticized finned coil and air circulating fans are contained within an easily accessible rear mounted housing. Unique airflow design allows the cabinet to be enclosed on both sides or mounted flush against a wall. Refrigeration system, fully charged with R-134a refrigerant, is designed to maintain 38°-41°F while operating with an unrestricted air supply in an ambient temperature of 100°F. All condensate water is directed to a non-electric condensate vaporizer located in the compressor compartment, no plumbing is required. A strict quality assurance team inspects all materials and components to certify the model conforms to the most exacting standards. Model is performance tested for a minimum of 16 hours prior to crating.

CABINET CONSTRUCTION

Materials are top quality, assembled under rigid supervision conforming to strict quality assurance requirements. Case is welded metal construction, internally supported and braced for rigid unit construction. Exterior, interior and worktop are heavy-gauge polished stainless steel. Design eliminates overlapping panels with raw edges. Interior corners are rounded with 1/4" radius. Joints and seams are vapor-tight sealed. Easily removable anti-sweat door heaters, concealed by non-metallic, non-conductive, high impact thermal breaker strips, eliminates condensation build-up on case front.

DOOR CONSTRUCTION

Door shells are constructed of heavy-gauge stainless steel and are internally braced and urethane-foam-insulated for rigidity. Door corners are of welded construction and polished. Replaceable snap-in door gaskets are self adjusting, heavy-duty, magnetic type. Door handles and hinges are chrome-plated and non-corrosive. Hinges are spring loaded, heavy duty and self-closing.
